RMIS Announces Its Onboarding and Compliance Management Services Now Integrate with RevenovaTMS

New Integration allows RevenovaTMS Customers Access to Carrier Insured Status

WESTLAKE VILLAGE - July 29, 2019 - RMIS, the industry standard for carrier onboarding and insurance monitoring, announced that its services are now integrated into Revenova's cloud-based transportation management system (RevenovaTMS) allowing their customers easy access to the compliance status of their carriers.

Clients of Revenova and RMIS will be able to automatically monitor carrier insurance and compliance information directly from within RevenovaTMS, saving time and money on costly manual in-house management. This new integration reflects Revenova's mission to streamline the end user's day-to-day workflow.

RMIS tracks 95 percent of all active motor carriers in the transportation industry, which means RevenovaTMS users will have access to the majority of Certificates of Insurance on file for the carriers they are looking to hire. By entering user-defined qualifiers into the system, clients can validate that carriers are insured in a way that uniquely lines up with their business rules.

"Carrier Relationship Management is a key feature of RevenovaTMS. Tightly integrating RMIS gives our customers a powerful option to quickly on-board, evaluate and monitor carrier risk from within RevenovaTMS," says Charles Craigmile, President and CEO of Revenova. "Customers benefit from RMIS-powered carrier profile management within the TMS resulting in real-time compliance decisions, workflow and alerts."

"RMIS and Revenova share a commitment to provide exceptional services to our clients. We are very excited to add Revenova as an integration partner and look forward to merging our trusted compliance services with their exceptional platform," states Bill Nordhus, Director of Sales at RMIS.

About RMIS[®]

Since 1996, RMIS has specialized in Insurance Monitoring and Compliance Services for brokers, 3PLs and shippers located nationwide and in Canada. RMIS collects and monitors Certificate of Insurance information, manages compliance rule sets for its clients, and offers customized tools to significantly reduce risk, cut costs, eliminate paperwork, and automate the registration and compliance process. RMIS's advanced technology coupled with live customer service gives clients peace of mind knowing they can utilize properly insured carriers who meet all their unique requirements.
